## 3=94

## POTENTIAL HAZARDOUS WASTE SITE SITE INSPECTION REPORT

REGION

SITE NUMBER (to be essigned by Hq)

GENERAL INSTRUCTIONS: Complete Sections I and III through XV of this form as completely as possible. Then use the information on this form to develop a Tentative Disposition (Section II). File this form in its entirety in the regional Hazardous Waste Log File. Be sure to include all appropriate Supplemental Reports in the file. Submit a copy of the forms to: U.S. Environmental Protection Agency; Site Tracking System; Hazardous Waste Enforcement Tack Force (EN-335); 401 M St., SW; Washington, DC 20450.

TO: William Goode

FROM: Daniel Cozza

SUBJECT: TDD# F5-8009-5, #146/Identified by FIT; Site #146

Woodford Road Quarry, Elyria, Ohio

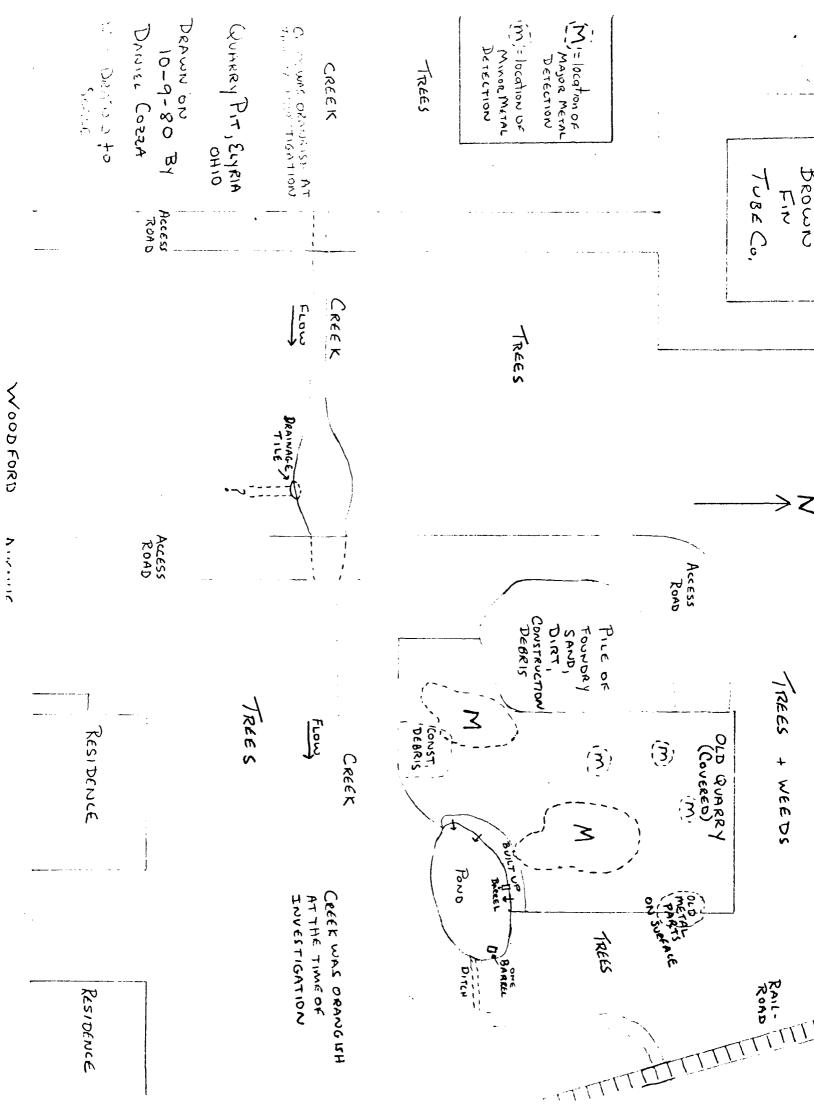

On October 2nd, R. Bartholomew, Renee Hix, and the writer returned to the Elyria City Landfill to pick up monitoring information from Mr. Jack Byam, City Superintendent. After conducting our business with Byam, he began talking about Chemical Recovery, which is also located in Elyria and about how they did dispose of some drums there at the landfill. He then informed us of an old quarry just down the block on Woodford Ave. and said something to the effect that, when they could not bring it here (Elyria Landfill) anymore, they brought it over there. Both Bartholomew and myself interpreted that as meaning that Chemical Recovery was using this old quarry to dispose of their solvent drums. Bartholomew questioned Byam further and Byam still lead us to believe that Chemical Recovery did use that quarry.

On October 9, 1980, Bartholomew, Anne Sause, and the writer conducted an on site of the now recently filled in quarry. We observed construction debris metal machine parts and foundry sand strewn over the site. We noted a 55-gallon drum floating in the pond on the site and a smashed drum in the built up area near the pond. We then proceeded to walk the site with a metal detector. We found two large areas with high metal readings and several areas with lower readings. Some scrap metal was noted.

After the on site inspection we questioned two residences across Woodford Ave. and also a truck driver dumping construction debris at the site. They all had stated that they had not seen any suspicious material enter the site. Later that day, we encountered Byam and asked him about the site and Chemical Recovery's involvement. He denied saying that Chemical Recovery was involved.

So even though the metal detector's readings could just be from buried machine and construction metals, the evidence of the drums in the pond and Byam's initial comments about the site, warrants that this site be investigated further. I therefore recommend that the site be followed-up as a medium priority.
